## Collholme Collections

John Duncan and B. Bjorsvik left last Saturday for Red Deer to attend the Nazarene Camp Meeting being held there.

Miss Helen Thompson is visiting at the home of W. W. Wilson.

On July 9 the Collholme Sunday School held its annual picnic at Gray's Lake, 25 miles north of Chinook. The majority of cars left town at 10:30 a.m. and got to the lake in good time to prepare dinner. After dinner was served a soft ball game was held, which resulted in a win for Ewart Duncan and his squad. The picnickers then took refuge in the lake from the hot sun and for two hours they enjoyed the refreshing water. A. Sweeney persuaded two of his youthful friends to swim the length of the lake. They did so and were none the worse for the adventure. After tiring of the water the party returned to shore, where they were entertained by foot racing. Prizes were given to the winners. About three o'clock more cars arrived from Chinook and three more ball games were played. Supper was served at 6:30 p.m. and after gathering up their belongings the folks set out

for home, and all reported having had a very enjoyable time.

"Sandy" Duncan received severe burns to his face last week, not from fire, but from the sun. His mind was so spellbound that after coming from the waters of Gray's Lake he forgot to dry his face.

Les. Berry is constructing a fence around the farm formerly owned by H. H. George.

C. R. Wilson received painful injuries to himself when he was thrown off his plow, falling on one of the levers.

Jack Shier hurt his eye last week when he ran against the sharp edge of a wagon box.

Last Friday a very good rain fell in the district. This rain was much needed, and the crops are now nearly all headed out.

Miss A. MacPherson is visiting at the home of Dan MacLennan for a short time.

Chris Davis and John MacKinnon visited at the Morrison home on Sunday last.

Several of the Chinook baseball fans motored to Hanna Friday evening to witness the ball game between that town and Castor.

## J. L. CARTER DIES SUDDENLY

Word was received last Tuesday of the death at Lacombe of Mr. J. L. Carter, formerly proprietor of the Acadia Hotel.

Mr. Carter was an old time resident of this district and was well known by everyone. For about fourteen years he was proprietor and manager of the hotel in Chinook and was well known to the travellers throughout the province. About a year ago he sold his business to the present proprietor and moved to Lacombe with his family, where he made his home.

Deceased had not been in the best of health for some time and his sudden death was not unexpected. He leaves to mourn his death his widow and one daughter, Dorothy, and son, Allan.

The funeral took place this afternoon.

## Sent Up For Trial

John Matichyk pleaded guilty on July 4th, when he came before Police Magistrate Gilchrist, of Youngstown, to both the robbery of the post office at Hemaruka on Monday, June 23, and mutilation of the tires on a number of cars owned by Veteran people the same night.

The accused was taken to Hemaruka by Const. Rogan, A.P.P., where he demonstrated how he had entered the store of Mr. Hamilton through the rear door, using a key of his own, and had got into the post office, where he had taken \$8.84 from the till and a gold watch belonging to Mrs. Hamilton.

Two charges were laid against him, that of wilful destruction of property, which was heard first, and had reference to the damage done to the car tires, and a second charge of breaking, entering and robbing the post office. On the first count he was fined \$10.00 and costs, or in default thirty days in Lethbridge jail, and chose the jail sentence.

On the charge of robbing the post office the accused was sent up for trial to the district court.

## Crop Report

The high temperature of the past few days has been most welcome in the northern and western parts of the province; the moisture supply is abundant. Crops in this area have made excellent growth, but continued cool weather in June has tended to retard progress toward maturity. The present warm, bright weather will correct this condition.

The central eastern area may be described as patchy. In some parts the recovery has been remarkable, due to frequent showers. At other points, less favored recovery is only partial. On the whole the crop outlook continues to show improvement.

Along the line of the Calgary Macleod Railway there is promise of a normal crop. Eastward and farther south crops have suffered from drought during the past fortnight. Rainfall at various points over this area, in the past few days, has brought a measure of relief and a more optimistic outlook.

Hail damage has occurred at several points in the province, but the areas involved are not large. Coarse grains are making favorable progress. Haying is general throughout the province, the crop being reported slightly below average on account of the cold dry spring.

## Heard Around Town

J. Cooley was a visitor at the Calgary stampede last week.

E. O. Hocart spent last week at Calgary, taking in the stampede.

Chas. Abbott, Little Gem, took in the Calgary stampede last week.

Miss Faye Robinson is visiting with her sister, Mrs. T. N. Mason, of Rearville.

Chas. Buesque, of Rearville, took suddenly ill last week, but is recovering.

Mr. and Mrs. John Walzak, of Chilmark, took in the Calgary stampede last week.

Wm. Bonham, north of town, was a Calgary visitor last week, taking in the stampede.

Several of our citizens went out to the dam last Sunday afternoon and enjoyed the bathing there.

Master Harrington, son of O. D. Harrington, Big Stone, took in the stampede at Calgary last week.

Geo. Senecal, of Seattle, Wash., is visiting at the home of his two sons, Lionel and Assa, at Rearville.

Mrs. Chinard, of Edmonton, is visiting at the home of her parents, Mr. and Mrs. Chas. Buesque, at Rearville.

Mr. and Mrs. L. W. Spreiter and Mr. and Mrs. D. C. Spreiter were visitors at the Calgary stampede last week.

Joice Milligan, who has been visiting for the past two weeks at the home of her uncle, R. Vennard, at Alsask, returned home on Sunday.

O. Osterberg and family motored to the river last Sunday. Mr. Osterberg is getting quite a reputation for being successful in catching fish.

Mr. and Mrs. Edmund Neff and little daughter, Dixie, of Hanna, arrived here Tuesday and will visit for a few days at the home of the former's parents, Mr. and Mrs. C. E. Neff.

Mr. and Mrs. Suitor returned on Monday from their trip to Calgary, Innisfail, Red Deer and Sylvan Lake. They report crops looking about as good here as any they saw in their travels.

The wedding was quietly solemnized to the river last Sunday. Mr. Osterberg is getting quite a reputation for being successful in catching fish.

While at the stampede last week some of the visitors were greatly fascinated with the dress and display of the original Americans, and secured snap shots of the occasion as mementos. Mr. R. Whelan was caught between two Indian girls, and of course had a time explaining how it happened.

On Thursday evening the Chilmark district, south of town, was visited with a real cloudburst of rain. All the sloughs for some miles distant were filled with water. The people living in that district feel very grateful for the soaking rain, as they had missed some of the recent rains that had been in the Chinook district. The rain came just in the right time to assist in saving the crops.

The Hand Hills Lake Stampede, described as Alberta's finest one day western round-up, will be held on Wednesday, July 23, at the Hand Hills Lake club grounds according to announcement made this week. Hundreds of dollars worth of prizes and purses will be awarded and every contest known to the cowboy world will be competed for. A programme of horse races will also be held, with a dance in the evening concluding the festivities.

## How's Your Bank Account?

It is a common thing for parents to open a bank account for a very young child, taking care of the account until the child is old enough to manage it. Then the bank book is turned over, and Dick or Ruth shoulders a new responsibility.

In this way the child is, early in life, taught the valuable habit of thrift. Practical lessons in the keeping of accounts and records are learned. And as these small savings are conserved and mount upwards, a substantial sum of money is created which will make adequate provision for the later education of the child, or constitute a reserve of capital to start a boy in business or enable a girl to assist in establishing her own home.

Famous legends in commerce have said that regular saving, even on a small scale, is the surest foundation for financial success. To save only five dollars a week is to build up a financial reserve, which will grow. To contract five dollars debt weekly is to accumulate a growing burden.

Nature starts each of us in life with an account at the Bank of Health, which is handed in trust by older folk, until we reach the age of responsibility for the care of the body. It makes all the difference in the world whether we handle our health account wisely or foolishly.

How is your account at the Bank of Health? Have you a good balance? Is it shrinking instead of growing? You ought to know.

Nature abhors and punishes waste while she approves and rewards thrift, both in what we call the big realm of Nature and in the individual human life.

Experts tell us that reckless and unchecked cutting and fishing threaten the existence of some of the world's largest forests and fisheries. The supplies we thought unlimited may fall. We are learning that continuance of supply depends on conservation, which is simply a bigger word for thrift.

The same is true of health. Nature exacts heavy penalties for waste. Preventive work promotes and assists the practice of health thrift.

Just as a savings account is built up by small deposits, so, too, must our health reserve be built up. Enough food and exercise, enough rest and relaxation, must be deposited in the Bank of Health every twenty-four hours. These deposits must be in good currency, too. Nature, like our bankers, accepts no bad bills or counterfeit coins.

Why not look into this matter of your account at the Bank of Health? A wise way to begin is to go to your doctor for a complete medical examination. Don't wait until you are sick to visit your doctor; go to him when you are well and have him check you up. Take stock.

Another good plan is to repeat the process of a thorough medical examination at least once a year,—say, on your birthday anniversary. In this way any disease which may, quite unknown to you, be making insidious headway, will be discovered in its early stages, checked and cured, but which if left to develop undisturbed until you begin to "feel sick" may by then have reached the stage where it is beyond cure.

### World's First Talkie Sign

Novelty Introduced At Chicago By Envelope Company

What is probably the first talking sign in the world made its debut before a crowd of over 3,000 Rotarians with a speech boasting Chicago, telling about its schools, churches, parks, playgrounds, libraries, universities, boulevards, policemen and other civic assets.

George D. Gaw of the Gave-O-Hara Envelope Company, is responsible for the sign, which is a 50-by-20 foot affair on the envelope company's plant in North Sacramento boulevard.

The speech was made before the microphone and amplified through the loud speaker hidden in the neon lettering but in the future records lauding the city and boosting for its "Century of Progress" will furnish voice to the sign throughout the day, according to Mr. Gaw.

### Motorist Sued For Train Wreck

Had To Pay \$10,000 For Causing Derailment In Illinois

Automobile drivers must pay for the train wrecks they cause under certain circumstances. Such was the gist of a decision handed down by the district court for the southern district of Illinois and reported by the legal department of the American Motorists' Association. The suit arose as the result of a motorist driving over the tracks of a railroad, causing the derailment of an engine and five freight cars. The railroad sued the motorist for \$30,000. A verdict of \$10,000 was given, which was sustained on appeal to the higher court.

A tornado may travel as slowly as ten miles an hour, or it may speed at sixty.

Lead Mines of Spain and Britain were worked more than a thousand years before Christ.

## Four Doses Relieved Bad Attack of Cholera

Mr. W. J. Cooper, Marham, Alta., writes:—"A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few boxes to wait, and told one of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

### Airplane Flight To Far North

Government 'Planes To Open Up Air Route In Sub-Arctic Areas

To inspect aeroplane supply caches in the Canadian sub-Arctic and with a view to opening up aerial communication routes in the Northwest Territories, a special detachment of the two government aeroplanes will leave Rockcliffe Aerodrome in the near future for an air tour which may extend over 25,000 miles, most of it over a little travelled country.

Flight Lieut. F. J. Maudesley, of the civil aviation branch of the Department of National Defence, will be in charge and will pilot one of the two 'planes. Flight Sergt. H. J. Winny will pilot the other. In addition to the two pilots there will be two mechanics, Corporal S. C. Dearway, who will be the camera operator, and C. S. McDonald, inland surveyor of the topographical surveys.

The flight will be the first official government step toward the opening up of air lanes in the Northwest Territories. The majority of the trip will be in the vicinity of the Mackenzie River Basin, the Great Slave Lake area and northward to Coronation Gulf. The flight will also travel over that part of Canada lying to the west of Hudson Bay north of Churchill. With only a few exceptions all the caches to be inspected will be just to the south of the Arctic circle.

The detachment will return to Ottawa before the freeze-up.

## SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Edmonton Exhibition

Prize List Contains Regulations Regarding Surgical Treatment Of Show Animals

The Edmonton Exhibition prize list contains a regulation in the cattle section, that any animal exhibited, which has been so treated as to alter its natural conformation, will be disqualified. Competent veterinarians will examine the cattle to ensure the enforcement of this regulation. This is in line with the present wide agitation to eliminate the cutting of teeth and the surgical or other treatment of show animals for show ring purposes.

After Ten Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is amazing today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

### Chicago Stock Exchange

Suggested That Membership Be Extended To Canadians

The governing committee of the Chicago Stock Exchange has recommended to the membership of the exchange that the constitution be amended to admit Canadian citizens. Unless disapproved by the members in ten days, the proposed change will become effective.

Announcement was also made of plans to extend the Chicago Stock Exchange's ticker service into Canada within the next six months.

### A Huge Birthday Cake

One of the largest birthday cakes ever cut in London was consumed recently when the British and Foreign Bible Society celebrated its 126th birthday. The cake weighed 126 pounds—a pound for every year—and carried 126 candles. The cake was made in the design of a Chinese building.

### Voluntary Bird Census Takers

Many hundreds of persons in Canada and the United States are voluntarily assisting in the taking of a waterfowl census to determine any increase or decrease in the numbers of waterfowl that inhabit North America. This is not strictly a census, but very valuable data are being secured.

Minard's Liniment checks Colds at once.

W. N. U. 1846

### Saskatchewan Loses Valuable Man

Dr. W. Carrothers Accepts Appointment At University Of British Columbia

Dr. W. Carrothers, professor of sociology at the University of Saskatchewan, who has accepted an appointment as professor of economics at the University of British Columbia, will leave Saskatoon in time for the opening of the fall term some time in August.

Born in the County of Fermanagh, Ireland, Dr. Carrothers attended college at Belfast, coming to Canada in 1911. He attended Wesley College, affiliated with the University of Manitoba, graduating from there in 1916 with the degree of bachelor of arts. Upon leaving university, Dr. Carrothers enlisted with the 44th Canadian Infantry, later transferring to the Air Force. He was awarded the D.F.C. and the Croix de Guerre.

Following the war, he attended Edinburgh University and studied under Professor J. Shield Nicholson, obtaining the degree of Ph.D. He was appointed to the staff of the University of Saskatchewan as professor of economics.

At the University of British Columbia, the department of economics, sociology and political science are combined. Dr. Carrothers will be in the economics section, holding the position of second in the department.

Dr. Carrothers' work during the past few years has received widespread notice. His book, "Immigration from the British Isles," published in 1929, was very favorably received.

He has been closely identified with the work of returned men, for two years holding the position of president of the Canadian Legion here, and he also served a term as president of the provincial command. Since last December he has served as an alderman on the city council in Saskatoon, having been elected in the civic elections at that time.

### The Imperial Conference

Material Resources And Wealth Possessed By British Empire

The British government intends to enter the Imperial Conference free and unfettered by prejudice or bias, declared Right Hon. J. H. Thomas, secretary for the Dominions, in addressing the Empire luncheon at the opening of "Civic and Empire Week," at Colchester, Essex.

Mr. Thomas proceeded to discuss the unemployment problem and Great Britain's handicaps as the result of the financial burden of the war. He said the Imperial Conference would give an unique opportunity for a free and unfettered discussion of all the aspects of this question. As he had examined it, everything the United States possessed in material resources and wealth was possessed within the ambit of the British Empire.

"It is because of that knowledge that I, on behalf of the government, announce we intend to enter the Imperial Conference to consider every problem on its merits, unfettered by prejudice or bias, and prepared with a single minded desire to try to find a solution of the problem," he said.

### Has Heavy Task

Now U.S. Minister To Canada Has Busy Days Ahead

The United States senate without a record vote has confirmed the nomination of Colonel Harbord, U.S. Minister, of Iowa, as minister to Canada.

His tasks as American minister to Canada will be trying. There is bitter resentment throughout the provinces toward the new tariff bill. The stupids of prohibition enforcement on the border have almost exhausted the patience of Canadians. The administration of the Immigration laws, too, stands in need of civilizing.

Colonel MacNider has many busy days ahead of him.—Memphis Commercial Appeal.

### Japan Building 'Planes

Army airplanes built entirely in Japan are proving highly satisfactory, according to an official report issued by the aviation department of the ministry of war. Recently two scout 'planes made night-flying tests in which they met every requirement of safety, speed and general airworthiness. Airplanes are now being manufactured extensively by the Kawasaki and Mitsubishi dockyards.

### Minard's Liniment for All Strains

#### The Bishop's Discovery

"I never knew until I got a car," said the bishop, "that profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

## Serious Rectal Troubles Often Caused By Harsh Cathartics

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S  
"FRUIT SALT"

### Montreal An Important Port

Claims To Hold The Lead As A Grain Exporting Post

Despite the retarded grain movement in Canada in 1929, Montreal continued to hold the lead as a grain exporting port in North America, the comparison with other main ports on the continent being given in the Montreal Harbor Commissioners' annual report as follows:

Montreal	90,894,208 bus.
New York	68,895,992 "
Galveston	35,748,067 "
New Orleans	18,279,769 "
Baltimore	17,600,049 "
Philadelphia	9,419,595 "
Boston	4,104,479 "
Portland, Me.	2,427,655 "
Newport News	1,623,785 "
Mobile	1,115,659 "

### UNCOOKED SALAD DRESSING

Warm weather and plenty of vegetables combine to make the tempting salad a frequent dish on the menu. The secret of a delightful salad is the dressing and here is the recipe for an uncooked salad dressing that will be relished by every member of the family—and it can be made up quickly, and, once made, it will keep for weeks:

- 2 eggs.
- 1 teaspoonful salt.
- 1 teaspoonful mustard.
- 1 cup vinegar.
- 1 can Eagle Brand Milk.

Beat vigorously all ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken.

Persian Balm is magical in creating alluring complexions. A little gentle rubbing and your skin is invigorated and touched with the true beauty of youth. Charmingly fragrant. Delightful to use. Cools and caresses the skin. Relieves all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the perfect complexion. Unrivalled as a love-lift to beauty and charm.

The Regina Leader-Post says: "An optimist is a man who expects to do this year's business on last year's advertising."

### French Evacuation Of The Rhine

Reports State That Departure Of Troops Was Somewhat Hurdled

All was not so quiet and peaceful as official reports stated when the last French troops left Mainz and Wiesbaden recently, according to the Paris National organ, "La Liberté," which describes the departure under the headline of "violent incidents."

La Liberté says that, owing to hostile manifestations, booing and whistling by the crowd at the Mainz station, Gen. Guillaumat, commander-in-chief of the Rhine army, had drawn the blinds of the compartment occupied by himself and his staff. The newspaper also quotes a German newspaper story to the effect that the French troops covered the distance from their barracks to the railroad station in two minutes, whereas ten minutes was usually taken for the same march.

The Lokal Anzeiger calls it "pre-empted departure."

Gen. Guillaumat himself, who arrived in Paris with the president of the inter-allied high commission, M. Tirard, declared the departure of the French troops was effected normally without any noticeable incident.

M. Tirard said: "We have given evidence of our confidence in the good faith of Germany. May it be understood and appreciated by the government and population of the Reich."

### Time Not Worth Much

Do you know how many feathers are on a hen's back? The winner of a recent contest to determine just that has found there are on an average of 8,120. The winner dissected a hen's skin and painstakingly numbered each feather, arriving at the above total.

After thirty-five time seems to pass so rapidly that by the time you have forgiven somebody for his Christmas present it's time to do it all over again.

Talkies in German were recently shown in Helsinki, Finland, with some success.

**Don't Let Foods Stale**

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Appleford Paper Products  
HAMILTON LIMITED DNT.

HUNTER-MARTIN & CO., REGINA, SASK.

## The Pending Completion Of Hudson Bay Railway Will Stimulate Mining Interest

With the Hudson Bay Railway in its final season of construction and with improved passenger and freight service, exploration of mineral properties to which the Bay line is tributary, has started on a really important scale for the first time. Several companies and syndicates have launched programmes to develop groups of claims in the neighborhood of the new steel trail.

A dull mineral season is in view for the region north of Churchill, but reports circulating in mining circles point to interesting activity along the Hudson Bay Railway.

Within the past few weeks, half a dozen parties have travelled north on the line to explore promising areas quietly, before there are signs of a rush to one of the many new discoveries northeast of The Pas.

However, it is unlikely that prospectors will be allowed to travel south of Mile 412 this year, unless special arrangements are made with the federal government. More than one well-known mining man from northern Ontario has reached The Pas this summer with the hope of travelling to Churchill. But they have been disappointed. In one instance, a man raised an argument over the fact that an eastern station agent had checked his equipment right through to Churchill, and he had hurried to The Pas, only to find that he could not get to the port. Railway officials explained present regulations to the prospector, and he has to be content to postpone his trip until another season. It is reported in The Pas that efforts will also be made this year to trace down Indian legends that deposits of native silver lie in that great triangle south-east of the Hudson's Bay Railway, and bounded by God's River on the east, and Oxford Lake on the south.

Last year a few samples of beautiful flinty silver ore found their way into The Pas from York Factory. It was stated then that a York Factory man and some Indian companions had found the native metal somewhere in the mystic triangle. Excellent detective work on the part of mining engineers failed to show up the origin of the silver, and the find—if there has been one—remains undivulged.

For years, Indian lore has hinted of spectacular silver to be found in that 62,500 square miles of territory. This season may see a climax to the silent drama of centuries, and who knows but what a second Cobalt may spring up in that little explored region south of York Factory on Hudson Bay.

### Power Resources Of Manitoba

Claimed That 72 Per Cent. Of Water Power Resources Of Prairies Are Located In Manitoba

The considerable power resources of the Province of Manitoba are estimated at 5,000,000 h.p., of which 308,000 h.p. already are in operation. It is claimed that 72 per cent. of all the water power resources in the Prairie Provinces are situated in Manitoba. The Winnipeg River power sites are estimated to be sufficient to provide for a population of 2,500,000 in Winnipeg and to provide employment for 300,000 industrial workers. This power will turn out products worth in the neighborhood of a billion dollars every year.

### More Students In Paris

Latest registration figures of the University of Paris, place the total number of students at 65,980, an increase of 2,500 over the preceding scholastic year. Large outlays must be made for more lecture halls, study rooms and laboratories.

Wife (as they return from party): "Do you realize what you did?" Hubby: "No, but I'll admit that it was wrong. What was it?"

New Application Of Marconi's Invention

"Is that Signor Marconi? Could you light my lamps? The electricity company has cut off the current."—Guerin Meschino, Milan.

W. N. U. 1846

### Setting Pace In Egg-Laying Contest

Rhode Island Red Has Lead Of Seven Points

Records of the Canadian egg-laying contest at the Dominion Experimental Farm, Ottawa, this year, show egg production to be 27 per cent. above last year and 3.6 per cent. higher than in 1928 for the corresponding period. Birds entered appear to be swinging into greater production with the approach of summer, 33 pens having reached or passed the fifty-egg mark during the thirty-second week of the contest. It is interesting to note that of those 33 pens, 21 are White Leghorns.

While a pen of Barred Plymouth Rocks holds the leading position in the contest to date the leading individual layer so far is a Rhode Island Red. Two Barred Rock entries and this leading Rhode Island have laid the same number of eggs—14—but a slight advantage in weight on the part of the heavier Rhode Island Red gives her a lead of seven points over her nearest rival.

There is, however, indication that this year's egg-laying contest will show the same gratifying increase in egg production which has been in evidence each year since the contests were instituted in 1919. Some very fine records are likely to be hung up at the close of the contest.

### Will Work On "E. P. Ranch"

Two Lancashire Girls Take Jobs Offered By Professor Carlyle

Two Lancashire girls arrived in Canada recently on the Canadian Pacific liner "Duchess of York" en route to Peikisto, Alberta, where they will start their careers on the "E.P. Ranch."

The two girls, Doris and Muriel Howe, sisters, said, "We do not know what we are going to do out there; it may be clerical or it may be housework. But that doesn't matter. Professor Carlyle, manager of the Prince of Wales' ranch, engaged us and we are looking forward as much to the new job as we are to seeing our brother who is coming from Saskatoon to meet us."

Doris worked in the office of a grocery business in Blackpool and her younger sister, Muriel, was in the public library at Blackpool.

### Fruit Crop Prospects

Prospects For 1929 Crop Are Considered To Be Good

The fruit crop prospects for 1929, as on June 1st, are encouraging and, generally speaking, indicate the possibility of a total crop approximating that of 1928, according to the Department of Agriculture's crop report No. 2. Cherries, plums, peaches, pears and grapes all indicate considerable increase over last year, ranging from 9 per cent. in the case of cherries to 34 per cent. for plums. Apples promise well and while the total crop is expected to be less than last year, indications point to a yield equal to or slightly heavier than the average commercial crop for the five-year period 1925-29, estimated at 3,178,124 barrels.

### B.C. Canned Salmon

Importance of Coast Industry Is Shown By Figures

Shipments of British Columbia canned salmon from Vancouver to points outside of Canada in 1929 amounted in all to 1,213,097 cases of 48 pounds each, indicating the importance of the Pacific Coast canned salmon industry as a factor in the external trade of Canada. Australian countries continued to be first among the purchasers, with France second and the British Isles third. Thirty different countries were customers of the British Columbia canned salmon exporters last year.

### Does Not Indicate Hard Times

That the American people are still "rolling along" on rubber tires is evident from the March consumption figures of gasoline for forty-three states of the Union, which show use of 26,000,000 gallons daily, or 7.1 per cent. more than in the corresponding month of 1928. This does not look as much like "hard times" or decreased purchasing power.

There are upwards of 1,500 post-vans delivering mail in various parts of England.

The London city directory contains such names as Gotohed, My, Whiff, Ohno, Cops and Looney.

## CENTER FOR ALPINE CLIMBING

ALPINE CLIMBING—Jasper National Park

Into a country where there are many important peaks still unexplored and even unnamed, will come Alpinists from all over the world for the 1930 annual camp of the Alpine Club, of Canada, July 28th to August 16th, in Jasper National Park. Alpine members of the medical profession of England, will be among those at this year's camp.

In this vast mountain kingdom, climbers will try their skill in the Maligne Lake region, where such peaks as Mt. Sampson, Mt. Charlton, Mt. Urvin, Mt. Warren, Mt. Mary Vaux, Mt. Maligne, and Mt. Bruzau—ranging from ten to eleven thousand feet in height, offer most interesting climbing problems.

It is perhaps the splendid ruggedness, the massing of effects that distinguishes this region from all others. In the Rockies the folly of comparisons, where beauty is concerned, is always obvious. There are a score of lakes, each different, which, once seen, hold their place in the heart forever. Yet this stands out among them all. Where many of the others are chamber maids, Maligne is the great orchestra. The composition forms one picture.

but into it has gone enough beauty to make a dozen regions famous.

The Maligne Valley is one of the most interesting in Jasper National Park, not only on account of its remarkable canyon, but because of its two beautiful lakes—Medicine and Maligne.

The famous canyon of the Maligne River is an interesting example of what nature can do in the way of natural carving with uncounted aeons of working and with rushing water as her tool. Its great depth, its narrowness—in places it is scarcely more than a slit between dark walls of rock—and the great size of the pot holes, worn by the water in the course of ages, all make it of extreme interest to the geologist and nature lover and Alpinist.

One of the very interesting features of this canyon is the re-appearance of many places throughout its length of subterranean streams. It is believed that these streams form part of the submerged waters of Medicine Lake. Their combined waters so increase the flow of the river that by the canyon its volume is about four times greater than above the gorge.

### Big Building Year

Several Large Building Contracts Are Announced In Saskatoon

It looks like a big building year in Saskatoon. A new \$200,000 apartment house and a new \$500,000 technical school are now under construction, while the Dominion Government is spending about \$300,000 on the addition to its grain elevator. Also, contracts running to about \$1,000,000 are involved in extensions (from Saskatoon to Rosevear and Outlook in one direction, and to McFurt and Tisdale in another), of the Saskatchewan Power Commission.

### New Type Mail Box

Sweden Installing One Which Gives Detailed Information

A new type of mail box with a detailed information chart is now being installed in Stockholm under the supervision of Sweden's postmaster-general, Anders Orne. The chart not only tells when the box is emptied, but also gives the location of the nearest post office or automatic stamp vending machine, as well as postal rates and the departure of mail trains for various parts of Sweden and abroad.

## FASHION

### PARIS FAVORS PLAITS

A conservative printed crepe silk with lingerie collar and cuffs of crisp organdie reflects the newest ideas of Paris in plaited skirt treatment.

Price 25 cents in stamps or coin (coin preferred). Address Pattern Department.

## High Milling Quality Of Canadian Wheat Flour Is Proven Under Rigid Tests

### New Provincial Park For British Columbia

Is One Of World's Finest Stands Of Timber

Cameron Lake Forest, on Vancouver Island, one of the world's finest stands of timber, will be made a provincial park under the plans announced by Premier Tomin. As a first step in this project, probably the most important ever undertaken in Canada to preserve a virgin forest, the government has ordered an immediate closure of the entire Cameron Lake area. This will be undertaken by the provincial forestry service and a report will be filed with the government before fall.

The Cameron Lake Forest, known to travellers from every part of the world, lies between the lake and the hills which are crowned by snow-capped Mount Arrowsmith. It consists of giant fir, cedar and balsam, growing close together and reaching to such heights that the island highway, winding between them, is in twilight on a sunny day.

### Women's Institutes

1,150 Women's Institutes In The Rural Districts Of Ontario

There are now 1,150 Women's Institutes in the rural districts of the Province of Ontario with a membership of over 40,000. These Institutes exist for promoting social contacts and whatever is beneficial to the community as a whole, especially to women and children, through cooperative effort. The movement, started at Stoney Creek, Ontario, in 1897, has now become world wide. Women's Institutes, wherever they exist, are non-sectarian and non-party political. Recently an international conference of representatives of Women's Institutes was held at Vienna, Austria, at which delegates from most of the important countries were present.

### Canadian Tobacco Industry

Considerable Quantity Of Canadian Product To Be Shipped To England

"If the necessity arises, the government will not hesitate to appoint a special commissioner in England to look after the interests of the Canadian tobacco growers," stated Hon. James Macdonald, Minister of Trade and Commerce here, in commenting on the tobacco domestic situation.

"The Canadian Government is in close touch with the tobacco growing industry," said Hon. Mr. Macdonald, "and through its trade agents in Great Britain, has already put the British manufacturer in close touch with Canadian growers. It is expected a considerable quantity of Canadian tobacco will be shipped to Great Britain this year," he said.

### Destructive Wheat Disease

Loss Caused By Foot - Rot Greater Than Any Other

Of all the fungous diseases affecting wheat "Take-Ail," or foot-rot, is the most destructive, observed the Dominion Botanist, of the Department of Agriculture, at Ottawa. The actual loss caused by it is far greater than by any other single disease, rust included, or perhaps a combination of all known fungous diseases affecting wheat. A peculiar thing about this disease is that it appears only once in a series of years. Fortunately for Canada, the exercise of proper care and the wholehearted support of Western farmers have kept the disease from becoming seriously established in Canada.

### When Fate Was Cruel

Income Tax Papers Only Mail Rescued From Wrecked Steamer

Of 130 mail bags on a steamer wrecked on Shetland only four have been washed ashore, and of these four only one retained its contents in a condition fit for distribution. This was a bag of income tax papers—an instance of that "dry" humor which Scotland is famous. The worst of it is that when the papers are returned the authorities will not be able to distinguish the salty marks of the ocean from the tears shed by those by whom the documents were received.

### Study Indian Traits

Four French scouts, belonging to an organization similar to the Boy Scouts of Canada, except that they are college students, arrived recently at Banff, Alberta, where in the Canadian Rockies, they will make a study of Indians, for the ethnographical museum of Paris. They are Paul Causa and Gabriel Eyudnet, painters; Raymond Gid, naturalist, and Leon Chait, photographer.

### The British Empire

The British Empire occupies about one-quarter of the habitable surface of the earth and its population exceeds one-quarter of the estimated number of the human race.

### Manitoba Telephone Building

The Manitoba telephone system will commence construction on a 15-storey exchange this year which will cost in the neighborhood of \$1,000,000. Tyndall stone will be used.

An alert Italian delicatessen dealer built his shop over an old mine shaft, so that the upcoming stream of cold air serves to keep his perishable commodities cool.

### Produces Better Eggs

Poultry Experts Find Large Hen Excels In Production

The larger the hen the better the eggs she lays and the more there are of them. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will average 137.9 eggs a year, weighing 23 ounces to the dozen. With each 1/2 pound increase in weight there is an increase in the number of eggs laid and their weight per dozen—a four and a half pound hen will lay an average of 206.5 eggs a year, weighing 24.5 ounces to the dozen. This item should be of particular interest to farmers keeping poultry flocks.

### Ornamental Shrubs

Development Of Hardy Types Of Shrubs and Perennials

Not the least important of the work being done by the Experimental Farms and Stations of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals and garden flowers suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions, and the report of the Experimental Farm or Station nearest you will provide an indication of varieties adapted to use in your locality.

### Door Never Locked

The door of St. Martin's-in-the-Fields, one of London's famous churches, is never locked. For some reason they believe in St. Martin's that the church should be a sanctuary for those who are cold and wet, penniless and hungry, as well as a place of worship for all.

Airplanes are being used in battles against insect pests in Peru.

"I warn you that you'll have to pay for that bathing here." "Certainly, just take five out of my jacket pocket, because I'm committing suicide."—Gutierrez, Madrid.

WORLD HAPPENINGS BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expression of hope for the emergence of India from her present troublous era into days of peace and contentment.

Official figures on unemployment, showed 1,815,300 out of work in Britain on June 23. This was about 70,000 less than on June 16, but 697,495 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, is dead. Sir Joseph, who was known as "the grand old man" of New Zealand, was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest at the convention of the Optimist International, in Erie, Pa. Seven boys from clubs in the United States and Canada, competed. David Wolf, Washington, D.C., was first.

Marriages at famous Gretna Green, the elopers' haven in Scotland, are to be made extinct by legislation. The Government plans to pass by next fall a measure which will make legal only marriages which have been performed by a clergyman or a registrar.

The Quai D'Orsay has submitted the name of Andre Henry, who is French minister to Siam, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Knight, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

Plans To Visit The Moon

Scientist Has Perfected Model Of A Rocket That Will Make Trip At Horst, a little bathing place on the Baltic, Professor Oberth has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. This model rocket is to be shot up by the explosion of the gas it contains and instruments concealed it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the motors are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable secrets.

Boost For Alberta

Five Thousand Samples Of Alberta Wheat Sent To American Visitors

By way of an appropriate "boost" for Alberta, Hon. George Hoadley, Minister of Agriculture for the province, sent off 5,000 samples of Alberta wheat to American visitors to the recent Shriners convention at Toronto. It was pointed out that Alberta has carried off the world's wheat championship at the annual International Exposition at Chicago, four times during the past seven years, the honor going last year to Joseph H. B. Smith, of Wolf Creek.

Building Permits

Building permits issued by 61 cities in Canada during May of this year were valued at \$10,621,302. For the first five months of 1930 the total value of building permits issued by these cities had a value of \$65,267,996.

A bird's eye is protected by three eyelids.

Another peace note. Italy will build twenty more warships.

Doctor: "You say you have been drinking six glasses of beer a day? I can only allow you half that number."

Patient (after a pause): "I really believe I used to drink a couple more."—Mummel, Hamburg.

W. N. U. 1846

Will Explore Arctic Regions

Youthful Scientists To Spend Year In The North

Fifteen youthful explorers, whose average age is only 20 years, sailed from London recently aboard the exploration ship "Quest" for a year's exploration of the arctic regions. Their work will be done on the ice-covered stretches of Greenland and Iceland. The purpose of the voyage, which is under the auspices of the Royal Geographical Society, is to obtain information with a view to establishing an air route from England to North America across the Arctic regions, with only 300 miles over the sea. H. C. Watkins, 23-year-old explorer, is leader of the expedition. His fourteen companions are all about the same age, and each is a specialist.

Watkins made a scientific exploration of Labrador last year, and the expedition will establish a base on the south-eastern coast of Greenland and a station at the top of the Alps, 8,000 feet above sea level. From there they will make notes on meteorological conditions in connection with flying. The hold of the "Quest" was packed with a year's food supply, including six tons of food for the dogs, which will be poked up at the Faroe Islands. Two airplanes, two speed boats, sledges and several delicate meteorological instruments furnished by the government were included in the equipment.

A pampered passenger is a young turkey who is doomed to be served for the explorers' Christmas dinner.

Reports here said that if the data gathered proves the feasibility of the air route, a test flight will be made, and Canada will be asked to make a similar survey on the western side of the American continent.

Scotland's War Memorial

Not Even the Humblest Worker Has Been Forgotten

No one seems to be forgotten in Scotland's wonderful war memorial which is built on the Rock of Edinburgh.

There it stands glowing with the carved and colored badges of every Scottish regiment that served in the Great War. While in bronze friezes or stained-glass windows, sailors, artillerymen, airmen, chaplains, nurses, and other workers are depicted. Even birds and beasts have their memorials.

Carved on the walls are the words, "Remember also the humblest beasts that served and died." Then come medallions framing the heads of a horse, a mule, a camel, a message dog, and other animals, with a cage of carrier pigeons and a group of canaries and mice inscribed, "The tunnellers' friends," because these little creatures ate in bronze friezes or stained-glass windows, sailors, artillerymen, airmen, chaplains, nurses, and other workers are depicted. Even birds and beasts have their memorials.

Not even the humblest worker has been forgotten by the generous-hearted men who planned the building.

In the shrine is a block of marble set on the rock which rises through the floor, and on this block is a carrel given by the King and Queen enclosing books containing the name of every Scotsman who fell in the war. It is a place of pilgrimage to Scotsmen all over the world, this holy place printed in the noblest heroes and the humblest creatures are all remembered together.

Vancouver Boy Wins

Trip To England

Selected As Best All Around Canadian Model Aircraft Builder

Ross Parquharson, 16, of Vancouver, was selected as the best all-around Canadian model aircraft builder at the close of the national championships held at Ottawa. His victory, in both senior indoor events, added to his second and third places in the outdoor contests, won for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

J. A. Chamberlain, of Toronto, was a close second to Parquharson in the individual total, winning a first and second in the indoor events to add to the second-place points which he had won in the outdoor contests. He had a total of 15 points.

Canadian Coko

During the past few years there has been such a marked increase in the use of coke for domestic purposes in Canada that this fuel bids fair to become a serious rival of anthracite, which has long been regarded as the standard fuel for this purpose, at least in the provinces of Ontario and Quebec.

Minister—And what parable do you like best, my son?

Willie—The one about the multitude that loafs and fishes.

Winnipeg Newspaper Union

3444

IT'S SMART AND WEARABLE

A sportive frock of yellow and white printed line boasts of its plaited skirt treatment.

It has the smartly belted waistline like the grown-up are wearing, that achieves a pinched-in effect.

A large yellow bone button attracts attention to the tab closing of bodice with interesting open sleeves.

The back is quite straight and slender.

Style No. 3444 is simplicity itself to make. It can be had in sizes 6, 8, 10, 12 and 14 years. For the miss of 6 years, 1 1/4 yards of 30-inch material with 3/4 yard of 39-inch contrasting is sufficient to copy it exactly.

The two-piece skirt is merely pressed into box-pleat effect and attached to the bodice. Patch pockets stitched at edge of plaits, secure a snug neckline, to keep its line slender. It's so attractive in white cotton broadcloth printed in sailor blue polka-dots with cap sleeves, belt and pockets of plain blue.

Shantung is stunning in opal-pink shade.

Tub skirts in baby blue or baby pink tones is just the cutest idea ever that promises to be very popular this summer for beach and country wear. Nile green and white plaid print worn with green leather belt is smart. Yellow-beige and brown stripe in men's cotton shirting fabric is very attractive with the cap sleeves and pockets cut on the bias and worn with brown leather belt.

Printed dainty, printed handkerchief lawn and gingham checks also appropriate.

Price 25 cents in stamps or coin (coin preferred).

A Remarkable Record

Seven Hundred London Firms In Business For Century Or More

It will be a surprise to Londoners to learn that their great city boasts no fewer than seven hundred firms that have been in business for one hundred years or more. When we consider how easily businesses change hands, how they fall into decay through a change of fashion or the coming of new inventions, how families die out and how the younger generation feels over the urge to seek fresh woods and pastures new, it is a remarkable and praiseworthy record of industrious enterprise.

Although we may be inconstant in many things, we stand loyally by our prejudices.

The British Broadcasting Service will attempt to broadcast the roar of Niagara Falls.

Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was given near Lewes, Sussex, by Robert Kronfeld, a German, who is reputed to be the world's champion glider pilot. It consisted chiefly of a demonstration as how to operate the glider, and it was understood the prince did not actually pilot the ship.

The prince long has been an enthusiastic aviator and is reputed to be an excellent pilot, although for reasons of state he is never permitted to make solo flights. He always is accompanied on his flights by one of the best Royal Air Force pilots, but the prince handles the controls, except when taking off or landing on strange or difficult landing fields.

Montreal Has Grown Rapidly

Is Now Fifth Largest City On The Continent

Few cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now \$1,200,000,000. In 1914 the population was 625,000; today there are a million people in the city proper. In 1914 there were 153 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was \$10,500,000, is now \$36,750,000. Montreal has reached the rank of the fifth largest city on the continent.

Kept Appointment

Four Men Keep Tryst Started 31 Years Ago

Keeping a tryst started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Mansfield, G. MacDonald, G. Clifton, E. Blie, Brown and Edwards, were notified that the studio in which they worked was to be razed. They then made a vow to meet once a year. This year only Mansfield, MacDonald, Clifton and Blie were able to attend, but the two absent ones sent telegraphic greetings to their friends.

Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to a decision at a committee session, such conventions will be invited to meet directly prior to or following the show, in cities other than Regina. Delegates will thus be able to attend Regina session.

Legislative Wheat Pooling

In accordance with the decision of the Delegates of the Saskatchewan Wheat Pool at the recent semi-annual meeting, a referendum will be taken among pool members on the question of legislative pooling. Ballots will be mailed from head office not later than August 1, and each contract signer is being asked to register a vote on the question.

SUNDAY SCHOOL LESSON

JULY 20

MOSES "A COURAGEOUS LEADER"

Golden Text: "By faith he foresook Egypt, not fearing the wrath of the king; for he endured, as seeing Him who is invisible."—Hebrews 11:27. Lesson: Exodus 1:8-14; 2:1-22; 3:1-4; 11:1-10; 12:30-35; Deuteronomy 34:1-8; Hebrews 11:23-29. Devotional Reading: Psalm 90, 12-17.

Explanations and Comments

The Call Of Moses, verses 1-10.—The summons to become the leader of his people, deliver them from oppression in Egypt and bring them forth on their way to the Promised Land, came to Moses as, in his care of the flock of his father-in-law, Jethro, the priest of Midian, he wandered from the back of the wilderness (that is, the west; the east is always the front), to Horeb, the mountain of God. There before him stood a bush that burned and yet was not consumed, Moses heard God speaking to him. Just as the account of the temptation of Christ in the wilderness must have come from Christ himself, and is his pictorial way of placing before him all our experience, so the account of the call of Moses in the wilderness must have been told by Moses himself, and may have been taken by him in this pictorial way. The burning bush may have been an outward representation of an inward experience—the flame of enthusiasm for a great cause. Be that as it may, it is assuredly true that Moses had the power to see the divine origin of the glowing beauty of the bush; he was able to see God in the things of everyday life.

Moses stood before an ordinary bush, and he became aware of God; Jeremiah stood before a budding almond tree while all around was dead, and he became aware of God; Wordsworth stood before a little primrose on a rock, and it became to him the court of the Deity.—J. H. Jowett. "Draw not nigh hither; put off thy shoes (sandals) from off thy feet, for the place whither thou standest is holy ground." Recall Jacob's sense of God's presence at Bethel and the holiness of the place. "Earth's crowned with heaven, and every common bush affire with God; But once he who sees, takes off his shoes; The rest sit round it and pluck blackberries."—Mrs. Browning.

With a new flash of insight Moses knew that God was calling him to a stupendous task, that it was God's will that he should return to Egypt and accomplish the deliverance of the enslaved Israelites. All this is expressed in the words of verses 7-8.

Railway Passes In The Rockies

The map sheets of the Interprovincial Boundary between Alberta and British Columbia, published by the Topographical Survey, Department of the Interior, show the three passes of the Rocky Mountains through which railways have been constructed. Crows Nest Pass has an elevation of 4,453 feet; Kicking Horse Pass 5,320 feet, and Yellowhead Pass, 5,711 feet.

English Students For Canada

Hamilton Pye, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as Americans and South Africans are Rhodes scholars at Oxford.

Reciprocal Trade

British Bankers In Favor Of Free Trade Within The Empire

Reciprocal trade agreements between the nations comprising the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Hambro.

"Urgent measures for the promotion of inter-Imperial trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plea for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. While we retain hope for the ultimate extension of free trade worldwide, we believe the immediate step for securing and extending the market for British goods lies in reciprocal trade agreements between the nations of the British Empire. As a condition of securing these agreements Britain must retain an open market for all Empire products while being prepared to impose duties on all imports from other countries."

London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The promoters are anxious to build seventy-five miles of tubes at a cost of about \$200,000,000. All the principal railway terminal and goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 125,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to \$144,000,000 a year. According to the promoters of the new scheme the cost of existing congestion in the streets is \$120,000,000 per annum, while the railways have estimated at \$300,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

Eighteenth Century Newspapers

The first newspaper in Quebec appeared in 1764 when the Quebec Gazette was founded. The "Royal Gazette" and "New Brunswick Advertiser" appeared at St. John in 1785, and the first paper in what was then Upper Canada appeared in 1793 at Niagara (then Newark), under the name of the "Upper Canada Gazette and American Oracle."

China, home of the silkworm, is now importing artificial silk.

It takes eight large eggs, or nine small eggs, to make a pound.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. - - - - - TORONTO, ONT.

## BORDER PATROL IS COMMENDED BY U.S. OFFICIAL

Washington.—The Canadian border patrol was credited by Representative Clancy, Republican, Michigan, with having "practically killed illicit liquor traffic across the United States border."

Emphasizing that the Canadian Government is "absolutely co-operating," Clancy contended that there was no necessity for the "dangerous activities of the United States patrol in operating its boats without running lights." He recently protested to the treasury department that this was the practice of the United States patrol boats.

While lauding the Canadian border patrol for its "honesty, courtesy, service and efficiency," the Michigan representative quoted E. W. Camp, former commissioner of customs, as describing the United States border patrol as "about 90 per cent. crooked or inefficient."

Clancy attributed the difference he portrayed to the different liquor laws of the two countries. Canadians, he said, "respect and obey their liquor law because they have a good one." In the United States, he said, "we can't build our jails fast enough."

## France Delays Naval Program

Will Open the Way For Naval Negotiations With Italy

Paris, France.—Foreign minister Aristide Briand has announced suspension of France's shipbuilding program until December, to open the way for naval negotiations with Italy. He told the Foreign Relations Committee of the Chamber of Deputies, at the same time, that "another war in Europe is impossible and inadmissible."

M. Briand assured the committee there was no reason for "emotion concerning the relations between France and Italy."

Disclosing that no more ships would be put on the stocks in the French building program before next December, Minister Briand said Premier Mussolini had been informed of that fact officially.

In conclusion, the foreign minister asserted that while Italy had demanded naval parity the Italian government never had furnished figures or arguments to justify the claim.

## Must Import Wheat

Portugal Is Now Faced With a Serious Shortage

Lisbon, Portugal.—Because of a shortage of wheat, the National Association of Millers has suspended work. No fear of a bread famine was felt, however, since army stocks are sufficient to keep up the daily supply without resort being made to a ration system until the government is able to modify the law concerning the import of foreign wheat.

The public has been advised not to waste bread and the Minister of Agriculture has ordered all wheat merchants to declare their stocks so the government may be able to fix the quantity to be imported above the legal quota.

Alarming reports have reached Lisbon from certain parts of the interior where there is a serious corn shortage.

## New Woman Member For British House

Fourteen Now In Parliament, Nine Being On Labor Side

London, England.—With the election of Lady Noel Buxton to the House of Commons in the North Norfolk by-election, there are 14 women in parliament, the greatest number in history.

Of the 14, nine are Labor members; three Conservatives; one Liberal and one Independent. One of the 14, Right Hon. Margaret Bondfield, Minister of Labor, is the first woman to become a member of the British cabinet, while another, Miss Susan Lawrence, is parliamentary secretary to the Ministry of Health.

### Population Of Prince Albert

Prince Albert, Sask.—Local civic officials and members of civic boost organizations are claiming a population of 12,000 for Prince Albert, the voters' lists having shown there are 4,755 voters within the boundaries of the city. This may total is based on the contention that the number of those entitled to cast a vote is generally about one-third of the population.

W. N. U. 1846

## Labor Government Escapes Defeat

Have Slim Majority On Critical Division In British House

London, England.—Macdonald Labor Government escaped defeat by the slim majority of three votes in a critical division in the House of Commons on the finance bill. It was the smallest majority in this government's career, which was sustained by eight votes two months ago on the coal mines bill and lost a vote on a minor clause of the coal bill before that.

The vote was against an amendment moved by Rt. Hon. David Lloyd George, the Liberal leader, under which profits spent upon modernization or improvements of plants or machinery would be rendered exempt from income tax.

Although it was the Liberal leader who sought the amendment which met adamant opposition from the Conservative opposition, it was some of the Liberals who saved the government and further weakened the broken solidarity of the Liberal party in the House. Four Liberals voted with the Labor government. They were D. Simon, of the Withington division of Lancashire; Sir William Edge, Leicester; Sir Robert Hutchison and Percy A. Harris, Bethnal Green. Beside these, several Liberals, including Sir Godfrey Collins and Sir Donald McLean, abstained from voting.

## Boy Scout Jamboree

First Official Jamboree Ever Held In Canada Staged At Prince Albert National Park

Prince Albert.—First boy scout jamboree ever held in Canada was officially opened in Prince Albert National Park, with 476 scouts answering the roll-call. Situated on beautiful Lake Waskesiu, the site selected for the camp is ideal in every way. "Big Beach," nearly half a mile long, paved with clear, white sand, and curving out to Prospect Point, offers fine bathing facilities, combined with perfect safety.

Waskesiu Beach, the park headquarters and the site of the western summer home owned by Premier Mackenzie King, is a government model camp, equipped with kitchen shelters, open fireplaces, life-saving equipment, warden's quarters, service and filling stations.

## Ban On U.S. Apples

Order Issued By British Government Effective Between July 7 and November 15th

Toronto, Ont.—A. M. Wiseman, British trade commissioner for Canada in Ontario, has received official information from the British government of an order just issued, prohibiting the importation of raw apples from the United States into the United Kingdom, between July 7 and November 15.

Exceptions to the ban are: in barrels, United States grade and United States No. 1; in boxes, extra fancy and fancy. These must be accompanied by certificates signed by an authorized inspector of the United States department of agriculture.

It is learned that the embargo may be due to a fruit fly known as the "railroad borer," which is not believed to exist in England.

## Disastrous Forest Fires

Loss In Northern Saskatchewan During Three Months \$138,929

Prince Albert, Sask.—Forest wealth of more than \$138,929 went up in smoke in the fire ravages in Northern Saskatchewan from April 1 to June 30, Dominion forestry office revealed. This figure covers only 195 of the 225 fires reported in this period, but it includes the major conflagrations.

Including the disastrous fire at Birch Bark Lake, 171,627 acres were burned over by the fires; 21,723,000 board feet of valuable saw timber burned, and 3,033,000 board feet destroyed. Sixty-five thousand of the 108,338 cords of fuel and pulpwood in fire areas are salvageable. Causes of the fires are summarized as follows: Settlers, 91; campers and travelers, 43; incendiary, 34; railways, 14; smokers, 6; unknown, 5; lightning, 1, and lumbering 1.

### Marikman At 78

Blaisey Camp, England.—Sergt. MacKay, of Scotland, is 78 years of age. He won the King's prize, classic for Empire marikman, which it was called the Queen's prize then — back in 1883. But if anybody thinks he is losing his keen eye and steady hand he has only to point to the score card he hung up at the Blaisey meet recently—six consecutive bulls' eyes at 200 yards.

## Testing Out Glider

Flight Across Atlantic May Be Attempted Later

New York.—A wireless message from the liner "Saturn" revealed that the glider "Chinbourne Foster" stayed in the air for eight hours, believed to be the longest ocean flight ever made in a towed glider.

The glider, named for the Broadway actress who is sponsoring the venture, is being taken to Gibraltar for an attempted east-west flight across the ocean behind a ship. On the eastward voyage practice flights are being made by the youthful owners, Hugh Keavey and Robert Lewis.

## Had Narrow Escape

Marikman Left Grain Bin Just Before Wall Gave Way

Marikman, Sask.—J. E. Burke, local agent for the North Star Grain Elevator Company, narrowly escaped being buried alive here when a grain bin in elevators next to the one he had been cleaning, burst open, just as he had climbed out, pouring several tons of wheat into the space he had just vacated.

Had the breakage occurred but a few moments sooner, it is probable that Burke would have been hopelessly trapped in the bin, with little, if any, chance of getting out.

## VICEROY WOULD DEAL WITH FIRM HAND IN INDIA

Simla, India.—A fight to the finish with the civil disobedience movement was promised by the viceroy of India, Lord Irwin, in his address to the Indian legislature at Simla.

"As long as civil disobedience persists we must fight it with all our strength," Lord Irwin said. "I believe I have the right and best solution to the riddle of India will be found only in Britain and India joining together in the search."

Lord Irwin bitterly denounced the civil disobedience method of procedure instituted by Mahatma Gandhi, now jailed. He said it was a "deliberate attempt to coerce established authority by mass action."

"It, therefore, on account of its natural and inevitable developments, must be regarded as unconstitutional and dangerously subversive. Mass action, even if the promoters intend it to be non-violent, is nothing but the application of force under another form. And when it avowedly is intended to make government impossible, the government is bound either to resist or abdicate."

The present movement is exactly analogous to a general strike in an industrial country intended to coerce the government by mass pressure instead of argument."

In reference to the Simon commission's report on India and the proposed round table conference in London next autumn, Lord Irwin said:

"The responsibility of expressing a considered opinion has now passed to the government of India—and just as the Simon commission would have failed in its duty to parliament if it had not presented a report reflecting faithfully its own conclusions as members of the British Parliament, so the government of India would fail in its duty if, similarly, it did not approach a consideration of the commission's report with complete liberty of judgment."

## IN MOTOR ACCIDENT

Duke of York, who figured in a motor collision on his way to the second cricket test match at Lords, was uninjured.

## Investigate Butter Prices

Charge Made That Combine Exists Amongst Certain Produce Companies

Ottawa, Ont.—Charges that a combine exists amongst certain produce companies with a view to depressing the price of butter to the producers may be ventilated under the Combines Investigation Act, at least in one section of Canada, if the representations of Jean Francois Poult, former Liberal member of Parliament for Temiskaming, Que., are prosecuted to their ultimate stages.

In a communication to Hon. Peter Heenan, Minister of Labor, was enclosed a copy of a newspaper circulating in his constituency where in the assertion is made that the wholesale dealers "keep the market prices low when they purchase butter and accumulate it in cold storage for some time, selling it at an exorbitant price to the consumer later."

They thus deprive the farmer of his legitimate profits, says Mr. Poult.

The former member asked the minister to intervene under the Combines Investigation Act.

## Crooks Displace Decent Men

Given Election Posts In Chicago Despite Records

Chicago, Ill.—Throwing an illuminating light upon Chicago election districts and the ability of known crooks to get into public life, from minor positions to the state senate and the bench, a supplemental petition has been filed before County Judge Edmund W. Maguire.

The petition names 211 men and women, alleged to have police and criminal records, who have been appointed as election judges and clerks. This petition, signed by a large number of reputable voters, follows one filed last month in which 275 judges and clerks were named as having police or prison records. Men and women judges and clerks with clean records were displaced to make room for the list handed in by the political bosses, it is asserted.

### Expects Heavy Crop

Saskatoon.—Third generation Marquis wheat is standing four feet high on the farm of Henry W. Fisher, at Hague, Sask., north of here, and the heads are about four inches in length. If nothing happens to it, Fisher expects his 50-acre crop to go over 40 bushels to the acre.

## TWINS TAKE LONG TRIP

June and George Hunt, two-year-old Lancashire twins, sailed recently on six-thousand-ton liner Liverpool to Britannia, British Columbia, on board the Canadian Pacific liner "Duchess of Atholl." George looks as though quite capable of defending sister June and faces the world with the air of one ready for all hazards. However, Canadian Pacific officials, both on the ship and the railway, smoothed the way for the tots and their trip was one long playtime to the two of them.

## Milling Qualities Excellent

Millers In Britain Are Enthusiastic Over Garnet Wheat

Ottawa, Ont.—Considerable enthusiasm was expressed among millers of Great Britain and on the continent who investigated Garnet wheat as to its milling qualities. A report by L. H. Newman, Dominion cerealist, on the result of the investigations of specially bagged shipment of this blend of wheat overseas has been made public. For a time at least Garnet should be shipped as a separate variety, instead of mixed with Manitobas. This would give the millers an opportunity of knowing the variety they were dealing with and they could treat it to the best advantage.

The Federal Department of Agriculture decided to submit Garnet to test by millers in the United Kingdom, and in different European countries. A year ago 6,700 bushels were shipped overseas to men expert in milling to obtain their opinions as to its suitability. These men were asked a series of questions, and Mr. Newman's report includes the replies they made.

## Would Halt Immigration

President Benoit of the C.P.R. Would Put Check On Entries From U.S. and Europe

Toronto, Ont.—Immigration from the United States and Europe should be stopped for the time being at least, said E. W. Beatty, K.C., president of the Canadian Pacific Railway, in an interview here. Mr. Beatty would not include on the ban, however, "those British immigrants who bring their own capital and can proceed under their own steam."

"Unemployment is bad in the building trades, I think, because the usual projectors of big buildings are holding back until the wheat situation clears up. But if we have a normal crop this year and it moves out in a normal way, which it should, unless there is a permanent resistance in Europe, which I doubt, the situation in Canada should clear up," said Mr. Beatty.

## Proposed Power Line

Plan To Produce Power For Saskatchewan Being Considered

Prince Albert.—A proposal by interested of eastern Canada and the United States for expenditures of \$4,500,000 on construction of a power project at what is known as "The Horseshoe Bend" on the Saskatchewan River is under consideration of the Saskatchewan government.

The site for the proposed harnessing of the river, which would produce power for distribution throughout the province, is 35 miles east of Prince Albert.

It was learned here that the Fraser

Brace Engineering Company of Montreal, and Rollins and Sons, Boston, are backing the scheme. It is considered development of northern Saskatchewan's pulpwood resources would follow completion of the project.

## U. S. SENATOR SAYS TRADE WITH CANADA IS KILLED

Washington.—Senator George of Georgia, in a statement issued recently through the Democratic National Committee, assailed the administration for "strangling Canadian trade with the greediest tariff bill ever enacted." The tariff, he said, "has squeezed more than a protesting squawk out of our northern neighbor and best customer."

"Unwittingly or not, it has made the Smoot-Hawley-Grundy tariff an important issue in the forthcoming general election in Canada, to which country, in 1929, we exported \$948,000,000 worth of commodities, and from which we imported the same year shipments to the sum of \$502,000,000—a trade balance of \$446,000,000 in our favor."

"Obviously the loss or the serious curtailment of our trade with the Dominion of Canada is no trifling incident. On the contrary, it presents proportions which, in time, many assume aspects that will have to be treated as an economic calamity."

"Figures compiled in the department of commerce confirm the fact that when the president approved the Smoot-Hawley-Grundy tariff act he killed the profitable goose that lays the golden eggs with one stroke of his pen."

"It is to be regretted that efforts to promote friendly relations with our neighbors are not supported by liberal trade policies."

## B. N. A. BILL HAS RECEIVED ROYAL ASSENT

London, England.—The British North America bill has received Royal assent and became law. It has passed both Houses of Parliament in the extraordinarily short period of 15 days, notwithstanding the fact that the session has been unusually busy.

The bill amends the British North America Act to give effect to the arrangements concluded between the Canadian Federal Government and the governments of Manitoba, Saskatchewan and Alberta for the return of natural resources to the three provinces. The turning over of certain Crown lands to the jurisdiction of the province of British Columbia is also provided.

The province of Manitoba celebrates its 60th anniversary as a province-member of the Dominion of Canada, on July 15. It was in order that the bill might become law before this event that its progress through Westminster was so swiftly expedited.

## Claim Of Rancher

Earl Is Confirmed

Earldom Of Egmont Belongs To Alberta Man Says Judge

London, England.—Mr. Justice Eve in Chancery Division of the supreme court confirmed the claim of Frederick Trevelyan Perceval, former Alberta rancher, to the title and estates of the Earldom of Egmont.

His Lordship confirmed the decision made four weeks ago by the Master of the Chancery, F. W. Vandervort, who found the claims of Robert Pollan, retired optician, and James William Perceval, baker, should be dismissed.

Mr. Justice Eve granted a declaration that the "rancher earl" was entitled to the monies in the hands of the trustees, subject to trusts of settlements, and that the trustees should make a vesting charge in favor of Perceval.

## For Poultry Congress

Exhibits From Brandon District Now On the Way To Big Show

Brandon.—An exhibit of live poultry from the Brandon district is now on its way to the World's Poultry Congress, being held in London, England, this month.

Thirteen of the 50 birds going from Manitoba were contributed by exhibitors in the district. Mrs. Jos. Woods sent three Black Orpingtons; Jas. Clarke, three Black Wyandottes; John Windover pair of White Chinese geese; the provincial exhibition park, a pair of Canada wild geese; Roger Morrison, a Barred Rock cock; Mrs. John Mumsy, a white turkey tom; and Mrs. A. M. MacPherson, a white turkey hen. There are to be about 1,000 birds from all Canada at the show in London.

## To Make Long Trip

Government Aviators Have Left On Extended Flight To North

Lac Du Bonnet, Man.—Two Canadian government airplanes, equipped for a three-month cruise, hopped off on a trip which will eventually take them to Akivik, at the delta of the Mackenzie River on Canada's northwest shore. Under command of Flight Lieutenant F. J. Mawdesley, the party plans to go north by Stony Rapids, Sask., and along the Mackenzie. The return will be by Great Bear Lake and Coppermine River, Baker Lake, Chesterfield Inlet, and Churchill, at the terminus of the Hudson bay Railway.

### Vancouver Grain Exports

Vancouver, B.C.—There is now no hope that the export grain trade from Vancouver will reach 50,000,000 bushels for the current year 1929-30. The total exported to date is 46,837,287 bushels according to the regular report of the Vancouver Harbor Board. The export at this time a year ago was 93,594,934 bushels.

### For Poultry Show

Ottawa, Ont.—Representative of the aristocracy of the Canadian poultry world, 800 birds are assembled in Ottawa awaiting shipment to the World Poultry Congress, which takes place in London, England, towards the end of the month. They have been sent from every province of the Dominion.

The initial order for silverware for the new Waldorf-Astoria Hotel, in New York, calls for 100,000 pieces.

## Aids To Flying

Canada Willing To Work With U.S. To Better Conditions

The Canadian Government is ready to work with the United States for a closer co-ordination of airways communication and radio aids to air navigation, says a report from Washington.

Secretary of State Stimson said that word to him from the Dominion Government indicated that it accepted the recommendations of an informal radio conference held in New York last April, urging this closer co-operation.

Among the recommendations acceptable to Canada were that the international air ceiling frequency, 333 kilocycles, be not required regionally for aircraft or aeronautical stations in either country.

The conference further recommended that different national frequencies be established for the United States and Canada: that a long list of frequencies remain free from assignment by the United States within 750 miles of the Canadian border, and that this courtesy be followed by Canada with other frequencies.

## Industrial Manitoba

Annual Industrial Output Has Now Reached \$162,000,000

In the sixty years history of Manitoba as a province, the industrial output has grown from \$60,000 in 1873, to \$162,000,000, and the number of plants from 6 to 930.

The output of iron products in Manitoba increased \$5,248,000 last year, and now stands at approximately \$24,000,000 annually. The output of agricultural implements in Greater Winnipeg's three plants has grown from \$377,000 to \$1,187,000 in five years.

Winnipeg's furniture factories during the five-year period, 1924-1929, increased their output from \$137,563 to \$746,523, and they employed 149 more people and paid out \$157,000 more in wages.

Production among the various industries manufacturing textile products in Manitoba now exceeds \$14,000,000 annually. The group showed an increase of \$1,366,000 last year over the previous year.

## Anniversary Of The Strawberry

Four Hundred Years Since It Was Cultivated In England

This is the 400th anniversary of strawberries as a cultivated fruit in England. It was in 1590 that the favored berry of many had as a purchaser Henry VIII, who paid 10d. for a half a pint or "a pottle" of strawberries as the measure was then called. This, of course, was big money, for 10d. in those days meant as much as 10s. and more in these times.

In Eastern Canada the wild strawberry grows in such profusion and is such splendid eating that the cultivated berry takes a back seat. This is not so, however, in other parts of the American continent. I have been to the strawberry beds in Garden City, Northern Michigan, on the shore of the lake, and for ten cents (5d.), one could pick and eat all one wanted and stay as long as one liked. —London Sunday Pictorial.

## Foreign Americans

A young woman who has left to reside in Paris shortly after her marriage, six years ago, has returned to Detroit with her two small children. One is a girl of 4; the other a boy of 2½ years. Both children speak only French. In fact, neighbors say the baby cries even in French. The little girl has mastered one English word — ice-cream.

## Changed In Some Ways

"I'm glad to find you as you are," said the old friend. "Your great wealth hasn't changed you." "Well," replied the wealthy man, "it has changed me in one thing. I'm now 'eccentric' where I used to be impolite and 'delightfully sarcastic,' where I used to be rude."

"I hear that you have lost your wife as the result of a motor accident. Are you comforted?" "Not yet. The insurance companies are so slow in paying." —Montague, Charolier.

W. N. U. 1846

## Enstruments Needed For Good Orchestra

Names Of Many Are Not Familiar To Most People

"Music hath charms so we have heard, but it must have its virtues too, if the conductor of the orchestra has to remember the names of all the instruments. We used to think that an orchestra was most a matter of a piano, drums, a number of violins and saxophones—large number of saxophones. The excellence of the orchestra depended on the size, and the variety of the instruments and the variety of barnyard noises that could be played upon them.

We find, however, that our education has been sadly neglected. In a recent issue of the London Musical Courier we are given a list of the instruments that are represented in a good band or orchestra. As well as the usual items the list read like a menu. Thinking we had arrived at the salad course, we find celesta, which might be French for 'celebrity'; glockenspiel—indeed French for 'a fancy vegetable such as carrots or spinach, while we wait the cornetto di bassetti, tubas, euphoniums, fogotli saxophone and tympani disguised such devices as macaroni and raisin pie, and pickled pigs' feet.

Checking the article over we found to our surprise that musicians are quite familiar not only with the above but with some 56 other varieties, not the least intriguing of which were bassoons, bombardons, contra-bass (sounds like a fish), trumpet, oboe and heckelphones. This brings home to us the cheering thought that musicians evidently earn their living by the sweat of their memories like the rest of the world and by merely learning to look or feel a little. Apparently most of us will have to look to something other than a musical career if we are to find an easy road to fame and fortune. —Regina (Evening) Leader-Post.

## Baling Hay In Field

Machines Have Been Adapted To This Work On Farm

Manufacturers of hay balers are adopting their machines to the new demand for balers which may be used in the field to bale from the cock or windrow. The use of 4-cylinder engines mounted on the baler is one interesting feature. The engines are of the size and type used on combines.

In order to take advantage of the direction of the wind or the lay of the land, the feed table is arranged so that it may be used from either side of the baler. Extra capacity has been added to speed up production and lower the cost of baling, by making it possible to feed the machine with larger charges, while automatic facilities for placing the blocks are included. Longer baling chambers are used in order to give the wire man more time to tie a good bale.

For stationary baling, automatic feeders have been developed. This permits of capacity feeding at all times and usually makes it possible to eliminate a man from the baling crew.

## The Cry For Speed

When Daredevils Pit Their Skill To Establish New World Records

The world cries for speed — more speed. Automobiles, so-called, and boats that are only paper-thin shells housing monstrous engines are constructed at enormous costs in order that daredevils may pit their skill, not against one another, but against time, to establish new world records. The excuse that is offered to justify such recklessness is that refinements necessary to high speed are utilized for the betterment of all vehicles. But the real reason is that man likes to boast of having done something that no other has done. A nation feels pride when one of its nationals becomes a "world champion." —Washington Post.

## May Revise Game Laws

Revision of the game laws of Saskatchewan, is contemplated by Hon. J. A. Merkle, Minister of Labor and Industries, in whose department rests administration of the Act. A legislative committee of the Fish Game Association, will prepare tentative changes to be submitted to the next meeting of the Legislature. One of the chief changes proposed, will provide a new system of licensing.

## Holiday Restrictions

According to the strict letter of British law, a holiday-maker may not wander at will over a common, but must keep to the recognized footpaths. Even when walking on a public road he must not loiter to rest, view the scenery or make a sketch. Fortunately, law of this kind is more honored in the breach than the observance.

## Looking After The Tourist

Method Used In France Is Not Necessary In Canada

Adolph S. Ochs, publisher of the New York Times, recently made a speech in Paris, in the course of which he praised the French "Ministry of Tourism," whose business is the attracting of tourists to France and their protection while in France. It tries to see that French tradesmen and others do not employ extortionate methods at the expense of travellers from other countries. In proportion to its population, Canada probably has more tourists than the Republic of France, and most of us try to treat them well. We do not suggest that the Federal Government should set up a "Ministry of Tourism," but the business is one of vast importance to the Dominion, and therefore it deserves all the consideration and assistance which it is getting from the Federal and Provincial Administrations. Probably it should have even more attention.

## Demonstration Farm Records

Six Notable Records In The R.O.P. At C.P.R. Strathmore Farms

The Canadian Pacific Demonstration Farm at Strathmore, has just finished six notable records in the R.O.P. with two and three-year-old Holstein heifers, one of each age producing far more than sufficient to qualify for a place in the 20,000 pound list of cows. All of the heifers, excepting one of the two-year-olds, were bred at the farm and two of the three-year-olds made their records in the 305 day division. The leader in the group, Strathmore Pauline Pairchild, a three-year-old, in the 305 day division produced 23,563 pounds milk and 1073.75 pounds butter with an average test of 3.65 per cent. fat.

## New Slot Machine

Coin-in-slot safety locks for bicycles are being installed about some of the public buildings in Berlin. After one of the city's thousands of cyclists has chained his wheel to a small box at the curb it locks automatically. He then inserts a coin which releases the key for the lock and retains the key until ready to use the bicycle again.

## A New Method

"Beggars—'Do you 'appen to 'ave lost yer purse, me lord?" "Beggars—'Ah—no." "Beggars—'Then perhaps you can let me 'ave a little assistance, me lord."

## Skull on Side of Rock Commemorates 'Soapy' Smith

"Soapy" Smith was a tough guy. He shot men for fun of it and robbed them when there was nothing better to do. He had a trick of appearing to wrap a cake of soap in a five dollar bill and of selling it to a gullible customer for a few cents.

Because of that they called him "Soapy" up in Skagway in the gold rush days of '98. But "Soapy" was too tough and too slippery even for the rough frontier of the north. One day he was a bit slow on the draw. He was shot and killed and buried with his antagonist, whom he had mortally wounded, in the little cemetery adjoining the town.

When news of his sudden and long hoped for death arrived the townspeople apparently thought something should be done to commemorate the end of a desperate career.

Someone had said that "Soapy" was as hard as rock. So they painted a skull on a cliff and lettered

## Filing Homesteads In North

Rush To Take Up Land Near Prince Albert

More homesteads are being filed upon north of Prince Albert this year than any year since the country has been opened up and the rush to take up land is unprecedented, according to J. W. McDiarmid, prominent Prince Albert lumber merchant.

Mr. McDiarmid states that the new settlers are nearly all Canadians and Americans. They appear anxious, he said, to seize what they believe to be the last chance to secure free land in northern Saskatchewan. Settlement has pushed out 80 miles northeast and northwest of Prince Albert as a result of this activity.

The Prince Albert citizen sang loudly the praises of Emma Lake, a new summer resort 30 miles west of Prince Albert, which is being developed by a deep red sandy beach and set in scenery which he declares to be unrivaled for beauty even in that land of fine scenery.

The lake, Mr. McDiarmid said, will be one of the biggest drawing cards for tourist traffic since it is situated only a few rods off the main highway to the new National Park. He said that tourist traffic into the north has been impeded this year by unusually heavy and continuous rains. "It has rained almost every day this season," he said, "and as a result the growth of grain crops and grass is luxuriant."

## National Research

Canadians Returning From United States Appointed To Laboratories Staff

Twelve appointments to the professional staff of the National Research Laboratories have been announced. Three of these appointments are returning to Canada from positions in the United States, these being: William E. Graham, research fellow at the Mellon Institute for Industrial Research, Pittsburgh, Pa. B. G. Ballard, of the Westinghouse Electric and Manufacturing Company, Pittsburgh, Pa. and Morris Katz, investigator, Trawl Smelter reference, International Joint Commission, Northport, Washington.

## Oddities Of Electricity

People vary greatly in their resistance to electricity. A shock strong enough to kill a sober man will probably not kill the same man drunk, worthy person is less likely to be killed by an electric shock if asleep at the time it is received. People suffering from disease are usually very sensitive to electricity, but idiots are just the reverse.

## The Collar Nuisance

Plaint Is Raised From The Long-Suffering Male

Collars are a nuisance. Much has been written about the illogic of man's dress, about trousers that are ugly, coats that are hot, socks that are always slipping down; but of the twenty odd items of apparel (counting cut-throats) that a man wears at business, collars take the palm for inadequacy.

There have been several reasons advanced for the continued use of the collar. Some say that it is a relic of that age when men wore brazen bands about their necks as evidence of their slavery, and that the survival is due to the insistence of the modern woman that her husband put his collar on when company comes, to show that bondage still. There is evidence for this argument in the fact that the man usually puts his collar on. Others say that the collar really began with the male use of ruffs in the Tudor age when men were too busy to wash their necks.

But such arguments stand on more or less flimsy ground. The real source of the collar seems to have been in Adam's attempt to conceal the fact that he could not swallow everything his wife handed him. There was a bit of fruit, you remember, that lodged in his neck.—Edmonton Journal.

## The Flickering Light

The Dethroned Hero Is Always a Pathetic Figure

Fortunate are the men who walk the quiet lanes of life, content with the performance of modest duties. Renown is not for them, nor do they seek it. To be appreciated by their friends is the fulfillment of desire. When they at last leave off their tasks a few simple farewells suffice. The public does not mark their passing.

Not so of men who have reached high place. The dethroned hero is a pathetic figure. In our country, for example, much is made of baseball stars. For a few short seasons their ears ring with public acclaim. Then comes the inevitable day when they are through, skill and cunning gone. And when they are through they are conspicuously through. Eminences are hard to reach. The day of glory is short. After that the swift descent and the thud. —Toledo Blade.

## Elevation Above Sea Level

Geodetic Survey Is Placing Tablets All Over Canada

The method of the Geodetic Survey of Canada, of noting the various elevations above sea level throughout the Dominion, takes the form of affixing 3-inch bronze tablets to suitable permanent walls or bases whenever necessary. By reference to one of these bench marks, as they are called, the elevation above sea-level of any part in its vicinity can be ascertained. The tablets are to be found set up in a wide variety of places of permanence, such as town halls, post offices, libraries, banks, churches, railway stations, grain elevators, schools, armories, water tanks, water works, monuments, highway and railway bridges, subways, tunnels, stone arches, culverts, rock cuts, boulders, rock surfaces, and in other locations where they are not likely to be quickly affected by the passage of time.

## Investing Hours Of Rest

Great Need Is Sane View Of Using Sabbath Properly

With all our new ideas we have not improved upon the old custom of using the Sabbath as a day of rest and for the worship of Almighty God. That may strike the modern mind as being a trifle old-fashioned, but there is abundant evidence on every hand to show that it is actually and historically correct.

It is not necessary on Sunday to lock the motor car in the garage; it is not necessary to wear a particularly long face. The great need is a sane view of properly investing the hours, free from the labor of the week, which are measured out to us between Saturday and Monday.

## Opposed Confederation

For the first time since Confederation, there was no Dominion Day issue of an evening newspaper in Halifax. Consistent with the policy of its owner, C. C. Blackader, in continued opposition to Confederation, the Acadia Recorder never recognized the anniversary of provincial union by idle presses on July 1, but on May 10 of this year, one month after its owner's death, the Recorder ceased publication.

Norway is working to have all its labor difficulties at any time settled by arbitration.

## Prefers New York Route

Expert Points Out Difficulties In Airway Via Greenland

Although the idea of a southern trans-Atlantic air mail route that would bring English letters to Canada through New York is less attractive to Canadians than that of a northern route across Greenland, the project is a much more feasible one, is the opinion of Air Commodore J. A. Chamler, a director of Vickers Aviation, London, and of the Supermarine Aviation Company of Southampton, expressed when in Montreal after an aerial tour of Western Canada.

He saw many reasons why a northern airway would be difficult to establish. Lights would be necessary along the way; landing places would have to be available for emergencies in a part of the world where no one lives now; if radio beacons were to be used there would be dangerous interference because of the electrical phenomena of the north; heat would be necessary in the plane; sheds and buildings would be needed and these, too, would have to be heated; and travelling near the equator would obviate most of these difficulties.

## First Practical Lifeboat

Was Built By Henry Greathead In 1789

Devotion and courage are inseparably associated with the saving of life at sea, and even though the car-propelled boat has largely given place to the motor-lifeboat, the thrill of the launch and the excitement of the dash to the wreck still remain. The inhabitants of Tenby, in Wales, have witnessed many a thrilling and hazardous rescue, and they will have even greater confidence in future attempts now that their old motor-lifeboat has been replaced by a new up-to-date craft. The earliest lifeboat was designed by a Frenchman in 1765, but there is no record that it was ever put into service. The credit of having built its first practical lifeboat, in 1780, belongs to Henry Greathead. The Royal National Lifeboat Institution, which provides British coastal towns with lifeboats and life-saving apparatus, was founded in 1824.

## What City People Miss

Culling At Post Office For Mail and a Little Gossip

Folk in the big cities miss one of the best entertainments that is the privilege of small-town people going to the post office. Seven out of ten men and women will stop as they go by, and inquire for or look for mail. The chances are they don't expect any, but they want to stop just the same. Probably the mail will drop in twice after one mail is put up and before another comes in, justifying their act with the idea that a letter addressed to them had been misplaced and found. And a town which has a bad-humored postmaster is up against it, for part of the fun is going to the post office is to joke with the fellow who runs it.

## Maybe He Was

Two elderly men, both extremely deaf, met on a country road. Dave had a fishing pole in his wagon. When he saw his friend Jim he stopped the horse.

"Goin' fishin'!" shouted Jim. "No," replied Dave, "I'm goin' fishin'."

"Oh," said Jim, "I thought maybe you was goin' fishin'."

## More To The Point

Russian educational leader wants the children of the nation to have dolls fashioned to caricature "czars, capitalists, gendarmes, priests, Fascists, and social-imperialists." If they desire to instill terror in the children they may have dolls to represent the Communist assassins who murdered the Czar's family?—Los Angeles Times.

Reader: "Dear Editor: What's the best way to find out what a woman thinks of you?" Editor: "Marry her."

Auntie (to Willie, sucking his thumb): "Is it a very good flavor?" Willie (happily): "Taste it!" En Rolig Half Timma, Gothenburg.

## The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

## Heard Around Town

Mrs. Rideout and family are spending their vacation at Gooseberry Lake.

Mr. and Mrs. Todd and Mrs. Nicholson were guests Sunday at the home of Mr. and Mrs. W. C. Agar.

Miss Dorothy and Edmund Neff went to Veteran to play in the mixed doubles at the Veteran Tennis Tournament on Wednesday.

Mr. and Mrs. J. R. Reynolds, of Lethbridge, spent a few days this week visiting at the home of Mrs. Reynolds's sister, Mrs. B. Knibbs.

Mrs. Robt. Vennard and son, Hazen, and Mr. and Mrs. Max Lawson and baby, of Alsask, visited at the home of Wm. Milligan on Sunday.

Misses Margaret Bayley and Audrey Neff are on vacation, taking in the stampede at Calgary last week, and are spending this week at Banff.

Mr. Milne, of Edmonton, will speak at Chinook school on July 22, at 8 p.m., subject "Municipal Hospital," and on Wednesday at Heathdale school at 3 p.m.

Mr. and Mrs. Oscar Nelson and little daughter are on a two weeks vacation, visiting friends at Hanna, Edmonton, Aldersyde, Calgary, Lethbridge and Conroy.

Out of the 70 nominations held last Monday for the Federal elections, Robt. Gardiner, member for the Acadia constituency, was the only one elected by acclamation.

Miss Margaret Young, of Hanna, visited last week with friends at Field, B.C., and Banff, and is spending this week at the home of her parents, Mr. and Mrs. Jas. Young.

The following boys are at camp at Gooseberry Lake: Geo. and Jack Connell, Kenny Dawson, Ray Trogan, Happy Milligan, Vincent, Lorne and Chester Rideout, Billy and Leonard Youell.

## Heathdale Happenings

(Too late for last week)

The Wheat Pool meeting at Coltholme school was very well attended last Monday evening. N. D. Stewart gave an interesting report of the last delegates' meeting at Calgary, and several items of special interest were fully explained.

Miss Alvina Mitchell, of Drumheller, is spending the school vacation at the home of Mr. and Mrs. Walter Anderson.

A large party spent Sunday at the river, mostly folks from Heathdale and Big Spring districts.

Mr. and Mrs. D. J. Cochrane, of Drumheller, were in the district last week end looking after their farming interests here.

Thursday afternoon Mr. Robt. Cardiner held a meeting at Clover Leaf School. There was a very good attendance. Mr. Lorne Proudfoot, M.L.A., also spoke for a while on credit and banking.

Mrs. J. C. Hess spent Sunday at Hanna with her daughter, Mrs. Walter Anderson.

Walter Anderson has a broad smile these days, all because of a baby girl. Congratulations! Walt.

**HEATHDALE SCHOOL NOTES**  
School closed for vacation on June 30th. During term beginning Jan. 6th, 124 school days were taught. Highest attendance was made by Alta Gillette, who did not miss any of the 124 days. Next best attendance made by Robert Harrington and Kathleen Moore, who each made 122 days' attendance. Poorest attendance made by Hazel Wiles, who attended only 49 days. During week previous to Departmental Exams. for High School work, regular promotion examinations for the public school grades were held with following results:

John Allen, promoted from Grade VI to VII.

Margaret Whitley and Pearl Whitley from Grade IV to V.

Olive Whitley and Edward Whitley from Grade III to IV.

At Easter, George Whitley, Cecil Gillette, Betty Allen and Jewell Tyndall were promoted from Grade I to II.

Grade I stands as follows in order of merit: Hazel Harrington, Avis Leftwich, Ruth Harrington. Grade II, George Whitley, Cecil Gillette, Betty Allen. J. Tyndall left district.

High School exams were as follows:

Grade X, Lawrence Savage. Grade IX, Kathleen Moore, Mary Moore, Alta Gillette, Robert Harrington.

Results of these will not be known before latter part of July, or first week in August.

On Monday afternoon, June 30, a very pleasant social hour was spent at the school, pupils and parents of the Cando school being guests of Heathdale school. A short closing day program was given, followed by a ball game. A generous lunch was then served, to which all did justice, thus bringing to a close a very successful school year.

Improvements on school building and grounds will be made during holidays.

## When Johnnie Won't Eat

When little Johnnie pushes away his dinner plate, turns his head and emphatically registers his protest against food, mother grows gray with worry and anxiety. Sometimes she may cajole, often she will scold, and in rare cases she will spank the said little John in her endeavor to bring him to reason. Often everything fails and John is the winner.

For just such mothers there is an excellent article by Dr. Ira Wile in Hygieia. The doctor believes that a child's eating habits are the result of his home training, good or bad. He says there are various reasons for Johnnie's refusal. For example, he may be overtired and in that condition of exhaustion he cannot respond to food. A rest would conduce to an appetite, and small children need much rest between meals. Another cause is one of physical origin, when Johnnie refuses because he loves the attention that he secures thereby. Too much attention is often fatal, and frequently the child receives an overdose of instruction in table manners which turns him away from the enjoyment of his meal. The niceties of eating and the use of utensils, the ability to manage without spilling, is really a matter of time, and as the child grows

## Chinook Fair Committees

List of the various Committees for Chinook Fair:

**BASEBALL**—C. E. Neff, R. D. Vanhook, H. W. Butts.

**CHILDREN'S SPORTS**—R. Holloway, C. W. Rideout.

**HOCKEY**—D. J. Stewart, R. Stewart, Geo. Macdonald, Jas. Ferguson.

**CATTLE**—E. B. Allen, Neil McLean, Geo. Trogan, R. Marr, N. D. Morrison.

**HALL**—All Lady Directors, F. E. Foster, R. Maudsley, Geo. Waldruff, S. H. Smith, S. W. Warren.

**RING MASTER**—Ed. Davis.

**RECEPTION**—Mr. and Mrs. Jas. Young, Mrs. Isbister, Mr. and Mrs. J. Connell, Mr. Neff.

**FINANCE**—W. S. Lee, S. W. Warren, H. Dunster, L. S. Dawson.

**DANCE**—L. Robinson, C. E. Neff, Mr. and Mrs. E. Jacques.

**CONCESSIONS**—E. B. Allen, S. W. Warren.

**GATE**—F. Otto, J. Mielke, T. Gilberston, C. E. Neff, W. A. Todd, J. Young.

**BOOTH**—N. Murray, C. Peterson, E. B. Allen, A. V. Brodine, G. Trogan, B. Ferguson.

The special prize offered by Allen and Warren for best cooking done by any girl under 16 years, has been dropped from the list this year.

older, so he unconsciously acquires the habits of good breeding from the grown-ups at the family board.

Dr. Wile suggests that Johnnie should be allowed to miss a meal or two if he wants to, he should also be completely ignored when he appears in a negative state of mind, and on no account must he see the over solicitude of his parents. It is a cardinal rule never to show by look, word, or gesture the slightest concern as to whether he eats or not. It is well to place smaller portions of food on the plate before the tired looking child, and all emotional distress must be avoided.

## NOTICE OF SALE

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that one bay gelding, white star on face, white hind feet, no brand, age about 5 years, weight about 1100 lbs., was impounded in the pound kept by G. Ray Robison, located on the S.E. 1/4 Sec. 5, Twp. 27, Rge. 7, W. 4th Mer., on the 22nd day of June, 1930, and that the said animal was sold on the 5th day of July, 1930, to F. W. Hobson, of Chinook, Alta., and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

L. S. DAWSON,  
Secretary-Treasurer,  
Municipal District of Coltholme No. 243,  
Post Office Chinook, Alta.

**SHOPPING around for tires isn't necessary if you come here. We've got the tire you want at the price you want. And it's a Goodyear Tire — backed by Goodyear's record of long, trouble-free mileage.**

**All-Weather, All-Weather Heavy Duty, Pathfinder, Progress. High-pressure tires and balloons. That's our set-up.**

**Drive over and pick out those new tires now. We'll put them on without charge.**

## SERVICE GARAGE

COOLEY BROS.

Telephone 10 CHINOOK, Alberta

Drunk geese, driven on a common near Kistormas, Hungary, suddenly ran amok, cackling raucously. Investigation showed that a motor lorry had overturned and emptied several barrels of wine into a ditch, which the geese had drunk with results disastrous to their hitherto blameless behavior. The tottering revellers were observed late at night desperately seeking a way home.

## Church Announcements

**CHINOOK UNITED**  
Sunday School every Sunday 11 a.m. Sunday, July 20—Service at 7:30 p.m. You are cordially invited to worship with us.
